EDUCATION

National University of Singapore <i>B.Comp. in Computer Science (NUS College), Minor in Mathematics</i> • NUS Merit Scholarship.	Singapore <i>Aug 2026 - May 2030</i>
Singapore Polytechnic <i>Diploma in Applied AI and Analytics</i>	Singapore <i>Apr 2021 — Apr 2024</i>

WORK EXPERIENCE

AI Engineer (Volunteer) RAiD, Republic of Singapore Air Force • Implemented speech recognition and speaker diarization for Air Traffic Control using NVIDIA NeMo and vLLM, fine-tuning Qwen3, parakeet-tdt, canary-1b and NGPU-LM on H200 GPUs. • Shipped real-time transcription with edge-deployed LLMs for air traffic controllers; presented to the Chief of Air Force.	Oct 2023 — Present <i>Singapore</i>
AI Intern Bifrost AI • Trained YOLOv6-lite for mobile tank detection for ST Engineering’s Unmanned Vehicles Team; hyper-parameter optimisation for incremental learning lifted accuracy 16%+. • Fine-tuned a StabilityAI VAE to improve text and high-frequency reconstruction for synthetic-to-real domain adaptation. • Prototyped a zero-shot method using JinaCLIP to visualise missing data for NASA, BigBear AI and DSTA.	Apr 2024 — Jun 2024 <i>Singapore</i>
AI Engineer Intern, Video Analytics (Data Science and AI Division) GovTech Singapore • Lead AI engineer on an end-to-end CV pipeline for MSO’s OneService App, classifying thousands of daily municipal reports via zero-shot ensembles. • Built real-time animal welfare detection with OWLv2 for NParks; the pitch secured funding from the NParks executive board. • Red-teamed GovTech’s AI Image Detector with custom-trained LoRAs simulating locally contextualised deepfakes.	Apr 2023 — Mar 2024 <i>Singapore</i>

PROJECTS

Resumify (TODO-url) • Co-founder and AI Lead of a non-profit built with YellowRibbon.gov.sg, HTX, and the Singapore Prison Service; an AI platform helping ex-inmates craft resumes for job placement. • Secured a \$24,100 grant from the National Youth Council and signed a 12-month MOU with YellowRibbon; featured in Zao Bao. • Built the platform on Next.js with LLM agents, the OpenAI API and ElevenLabs, developed using agentic tooling: Claude Code, Codex, OpenCode, Ralph loop, Oh My Open Agent, Semble Search and Hermes.	Nov 2023 — Present
ATC-ASR: fine-tuned parakeet-tdt (huggingface.co/qenneth) • Holds state-of-the-art Word Error Rate on the ATC-ASR benchmark with a fine-tuned parakeet-tdt-0.6b-v3.	2025

PUBLICATIONS

Crowdsource, Crawl, or Generate? Creating SEA-VL, a Multicultural Vision-Language Dataset for Southeast Asia ACL 2025 • Co-author (bylined “Kenneth Ko Han Chen”) on a 100+ author SEACrowd collaboration; annotated Myanmar-specific imagery and contributed to paper writing.	
--	--

AWARDS AND COMPETITIONS

Lee Kuan Yew Award for Mathematics & Science – top graduate of cohort, Singapore Polytechnic	2024
IMDA Gold Medal – top student in the diploma, Singapore Polytechnic	2024
TCS CodeVita S10 – 8th of 100,000+ students globally; 17th of 30 at the Grand Finale, Hyderabad	2023
USA Computing Olympiad – Gold Division	2025

SKILLS

Languages: Python, C++, JavaScript, SQL
AI/ML: PyTorch, NVIDIA NeMo, OpenCV, YOLO, Grounding DINO, Transformers, LLM agents, LoRA, VAEs
Web and Infra: Next.js, React, Docker, AWS Lambda, GCP, NVIDIA CUDA, MLOps, Git
