EDUCATION

National University of Singapore Aug 2026 — May 2029
B.Comp. in Computer Science (NUS College), Minor in Mathematics Singapore

- NUS Merit Scholarship.

Singapore Polytechnic Apr 2021 — Apr 2024
Diploma in Applied AI and Analytics Singapore

- CGPA 4.0/4.0. Lee Kuan Yew Award for Mathematics & Science – top tech graduate, IMDA Gold Medal – top all-around achiever, SP Scholarship.

WORK EXPERIENCE

Resumify Nov 2023 — Present
Co-founder and AI Lead Singapore

- Built Chloe, a production ElevenLabs voice agent on FastAPI/Next.js/Supabase: seven authenticated tool-calling webhooks (resume analysis, section generation, keyword optimisation) with tool-call dedup and session-lifecycle reconciliation.
- Shipped embedding-based resume-to-job matching (cosine similarity over a Supabase-backed vector index) and a Playwright PDF pipeline across three multi-tenant deployments.
- Non-profit with YellowRibbon.gov.sg, HTX, Singapore Prison Service and SPD (resumify.org); 600+ users, SGD 24,000 National Youth Council grant, 12-month MOU, covered in The Business Times and Lianhe Zaobao.

Republic of Singapore Air Force (RAiD) Oct 2023 — Jun 2026
AI Engineer (Volunteer) Singapore

- Built the full-stack system analysing Air Traffic Control situations: an NVIDIA NeMo speech-recognition and diarisation layer feeding a Qwen3 reasoning layer served with vLLM.
- Deployed it to edge devices for real-time transcription in the control room; presented to the Chief of Air Force.
- Supervised technical decisions on the RSAF video analytics platform alongside NUS graduate students and NCS engineers.

Bifrost AI Apr 2024 — Jun 2024
AI Intern Singapore

- Trained YOLOv6-lite for tank detection with ST Engineering at a Sequoia-backed synthetic-data startup; incremental-learning tuning lifted accuracy 16%+.
- Fine-tuned a StabilityAI VAE to improve text and high-frequency reconstruction for synthetic-to-real domain adaptation.

GovTech Singapore Apr 2023 — Mar 2024
AI Engineer Intern Singapore

- Lead AI engineer on the production computer-vision pipeline for MSO's OneService App (Video Analytics, DSAID): zero-shot ensembles classifying thousands of daily municipal reports on AWS (EKS, SageMaker).
- Secured executive-board funding for real-time animal welfare detection built for NParks with OWLv2, tuned by Bayesian optimisation (Hyperopt).
- Red-teamed GovTech's AI Image Detector with custom-trained LoRAs simulating locally contextualised deepfakes.

PROJECTS

Air Traffic Control Automatic Speech Recognition (ATC-ASR) (huggingface.co/qenneth) 2025

- Fine-tuned parakeet-tdt-0.6b-v3 with NVIDIA NeMo to 5.99% Word Error Rate on the Jacktol ATC-ASR split, beating the previous state of the art of 6.5%; trained in under an hour on a single H200. 200+ downloads a month at peak.

PUBLICATIONS

Crowdsourcing, Crawl, or Generate? Creating SEA-VL, a Multicultural Vision-Language Dataset for Southeast Asia – ACL 2025.

- Co-author on a 100+ author SEACrowd collaboration; contributed Myanmar-specific annotation and writing.

AWARDS AND COMPETITIONS

TCS CodeVita S10 – 8th of 100,000+ students globally (2023) USA Computing Olympiad – Gold Division (2025)

SKILLS

Languages: Python, C++, TypeScript, JavaScript, SQL, Bash

ML and Systems: PyTorch, Hugging Face, NVIDIA NeMo, vLLM, LoRA, scikit-learn, NumPy, Pandas, OpenCV, ElevenLabs, Next.js, React, FastAPI, Supabase, PostgreSQL, AWS (EKS, SageMaker), Kubernetes, Docker
